PROFESSIONAL SUMMARY

Performance-driven Software Engineering undergraduate with enterprise internship experience at Zoho Corporation, specializing in backend architectures, cloud security systems, and applied machine learning. Proven track record in designing resilient multi-cloud telemetry pipelines, threat classification models, and deterministic risk-scoring engines across AWS, Azure, GCP, and OCI mapped to NIST CSF and ISO 27001 standards. Proficient in Python, FastAPI, PostgreSQL, and RESTful API integrations, with a solid foundation in scalable system design, automated testing, and secure software development lifecycles.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, SQL
Cloud Platforms Security: AWS, Microsoft Azure, Google Cloud Platform (GCP), Oracle Cloud Infrastructure (OCI), Linux, Cloud Security, Threat Analysis, Risk Assessment
Backend API Development: FastAPI, REST APIs, API Integration, Next.js, Node.js
Machine Learning Analytics: Random Forest, Anomaly Detection, SHAP, Security Telemetry, Risk Scoring, Compliance Mapping
Databases: PostgreSQL, MySQL, SQLite, Supabase
Developer Tools Testing: Git, GitHub, Postman, VS Code, Streamlit, Pytest
Engineering Practices: SDLC, Agile/Scrum, Unit Testing, Debugging, Authentication, Role-Based Access Control (RBAC)

PROFESSIONAL EXPERIENCE

Zoho Corporation **June 2025 – July 2025**
CRM Intern *Chennai, Tamil Nadu*

- Collaborated with a seven-member engineering team to design, debug, and deliver enterprise-grade CRM automation modules following Agile methodologies.
- Developed bespoke scripts and business logic across Zoho CRM and Zoho Books to streamline cross-functional operational workflows.
- Integrated Zoho CRM REST APIs for secure, bidirectional data synchronization between distributed internal platforms.
- Root-caused and resolved high-priority workflow edge cases, standardizing debugging documentation and improving pipeline reliability.

TECHNICAL PROJECTS

Multi-Cloud Security Risk Evaluation Framework *Python, FastAPI, Random Forest, SQLite, Pytest*
Cloud Security | Machine Learning | Threat Analysis

- Architected an ingestion pipeline to normalize disparate audit logs and security telemetry across AWS, Azure, GCP, and OCI into an extensible unified schema.
- Built an ensemble Random Forest classifier paired with a custom heuristic engine to calculate deterministic risk scores (0–100) for anomaly prioritization.
- Engineered high-throughput RESTful endpoints using FastAPI, featuring asynchronous processing pipelines and live telemetry metrics.
- Correlated threat detections directly against NIST CSF 2.0, CIS Controls v8, and ISO/IEC 27001:2022 security frameworks for automated audit mapping.
- Implemented granular RBAC, enforced strict secret management, and achieved high code stability with comprehensive Pytest coverage (31 automated unit tests).
- **GitHub:** real-time-cloud-threat-analysis

QuickLink – Scalable URL Management QR Platform *Next.js, React, TypeScript, PostgreSQL, Supabase, Razorpay*
Full-Stack Development | Database Design | API Integration

- Developed a full-stack platform providing low-latency link shortening, real-time click analytics, and dynamic QR code generation.
- Designed relational schemas in PostgreSQL and leveraged Supabase for row-level security (RLS), authentication, and persistent session state.
- Integrated Razorpay webhooks and transactional APIs to support end-to-end payment workflows and subscription tier access.
- Structured reusable, typed component libraries in Next.js/TypeScript to enhance frontend performance and maintainability.

EDUCATION

Rajalakshmi Engineering College **2023 – 2027**
Bachelor of Technology in Information Technology Chennai, Tamil Nadu
CGPA: 7.33/10
